Remove the upper mounting screws from the intercooler.  
Remove the intercooler.  
Remove the stock charge air pipes on both sides.*

## WAGNERTUNING Intercooler

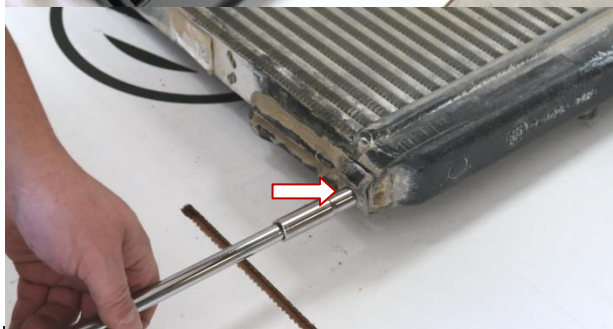

### 2. Preparing for the Installation

*For mounting the upgrade intercooler you need to prepare some parts. A later return back to the original intercooler will not be impaired.*

*Remove the rubber parts from stock intercooler and cut the like shown on the picture. Then install them to the WAGNERTUNING intercooler.*

*Also install the rubber ring to the upper bracket from the WAGNERTUNING intercooler.*

*Loosen the mounting brackets for AC from stock intercooler and install them to the WAGNERTUNING intercooler. Use the including M6x20 allen screws.*

## WAGNERTUNING Intercooler

*Please cut the plastic at radiator as it is shown on the following pictures. You can use a car body saw.*

*Prepare the WAGNERTUNING charge air hoses like the stock charger air hoses.*

## WAGNERTUNING Intercooler

### 3. Installation

*Install the the WAGNERTUNING charge air pipes on both sides. Use the including hose clamps and one stock hose clamp.*

*Hang in the WAGNERTUNING intercooler and fasten the upper screws. Also fasten the hose clamps.*

*Then install the AC back to position. Refill the liquid for AC.*

*After everything is checked for tight fit, you can mount the front bumper and the front grill.*
